## Algebra II Transformations on Quadratic and Absolute Value Functions

### STUDENT NOTES

Essential Questions:

- How do I recognize/perform transformations on quadratic functions and absolute value functions?

#### Slope of a line Parent Function

$$f(x) = x$$

$$y = x + 0$$

x	f(x) = x
-3	-3
-2	-2
-1	-1
0	0
1	1
2	2
3	3

#### Absolute Value Parent Function

$$f(x) = |x|$$

$$y = |x|$$

x	f(x) =  x
-3	3
-2	2
-1	1
0	0
1	1
2	2
3	3

| | = Absolute Value - The distance from 0.

ALWAYS POSITIVE

$$|-2| = 2$$

$$|2| = 2$$

**Quadratic Equation Parent Function**

x	f(x) = x <sup>2</sup>
-3	9
-2	4
-1	1
0	0
1	1
2	4
3	9

$f(x) = x^2$       $3^2 = 9$   
 $y = x^2$       $3 \cdot 3 = 9$   
 $-3 \cdot -3 = 9$

Quadratic equation has  $x^2$   
 make a U graph  
 called a parabola

**Graph each function.** You must memorize these "Parent" graphs

vertex = highest or lowest point

**Part I - Vertical Translation or Shift (Outside):**

- A.  $f(x) = x$       $y = x$
- Graph  $y_1 = x$  (dashed)
  - Graph  $y_2 = x + 3$
  - Graph  $y_2 = x - 3$

label each graph

$y = x + 3$   
 goes up 3

$y = x - 3$   
 goes down 3

x	f(x) = x + 3	F(x) = x - 3
-3		
-2		
-1		
0		
1		
2		
3		

B.  $f(x) = |x|$

Graph  $y_1 = |x|$  (dashed)

Graph  $y_2 = |x| + 3$

Graph  $y_3 = |x| - 3$

label each graph

$y = |x| + 3$

goes up 3

$y = |x| - 3$

goes down 3

x	$f(x) =  x  + 3$	$f(x) =  x  - 3$
-3		
-2		
-1		
0		
1		
2		
3		

C.  $f(x) = x^2$

Graph  $y_1 = x^2$  (dashed)

Graph  $y_2 = x^2 + 3$

Graph  $y_3 = x^2 - 3$

label each graph

$y = x^2 + 3$

goes up 3

$y = x^2 - 3$

goes down 3

x	$f(x) = x^2 + 3$	$f(x) = x^2 - 3$
-3		
-2		
-1		
0		
1		
2		
3		

Explain how a parent graph moves when adding on the "outside" and subtracting on the "outside."

Graph the functions *without* a calculator (first draw the parent graph using dashed lines)

- 1)  $f(x) = x^2 + 5$     2)  $f(x) = |x| + 5$     3)  $f(x) = |x| - 2$     4)  $f(x) = x + 1$     5)  $f(x) = x^2 - 3$

parent:  $y = x^2$

Parent vertex (0, 0)  
New vertex (0, 5)

parent:  $y = |x|$

Parent vertex (0, 0)  
New vertex (0, 5)

parent:  $y = |x|$

Parent vertex (0, 0)  
New vertex (0, -2)

parent:  $y = x$

parent:  $y = x^2$

Parent vertex (0, 0)  
New vertex (0, -3)

## Assignment

Date \_\_\_\_\_ Period \_\_\_\_\_

Graph each equation. Draw the parent graph with dotted lines. Label the vertex in the form ( , ).

1)  $y = x^2 + 2$

Vertex (0, 2)

2)  $y = x^2 + 1$

vertex ( , )

3)  $y = x^2 + 3$

vertex ( , )

4)  $y = x^2 - 1$

vertex ( , )

5)  $y = x^2 + 4$

vertex ( , )

6)  $y = x^2 - 3$

vertex ( , )

7)  $y = x^2$

vertex (0, 0)

8)  $y = x^2 - 5$

vertex ( , )

9)  $y = |x| + 4$

vertex ( , )

10)  $y = |x| - 2$

vertex ( , )

11)  $y = |x| - 3$

vertex ( , )

12)  $y = |x| - 1$

vertex ( , )

13)  $y = |x| + 3$

vertex ( , )

14)  $y = |x| - 4$

vertex ( , )

15)  $y = |x| - 5$

vertex ( , )

16)  $y = |x| + 2$

vertex ( , )
